Educational Event

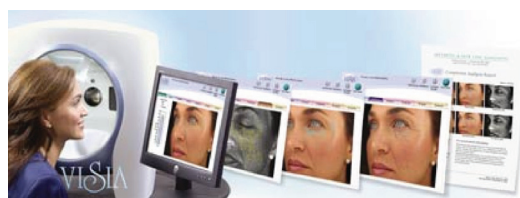

Digital Skin Analysis

Saturday, April 18, 2009

2:00 pm to 4:00 pm

Light refreshments will be served

Tikkun's innovative approach to skin care, integrating expertise in holistic skin care services with 21st century technology begins with the most advanced imaging equipment available to evaluate your complexion. The VISIA™ system captures digital photos of your face that are analyzed with various criteria to evaluate wrinkles, texture, pores and pigmentation. This educational skin evaluation and visual report are used to assist clients with accurate information to determine treatments and products that will be most effective for their skin condition.
