Educational Event

Feel Young and Vital with Bio-Identical Hormone Replacement Therapy (BHRT)

Thursday, April 18, 2009

1:00 pm to 2:00 pm

Light refreshments will be served

BHRT is prescribed to relieve symptoms of menopause, though more recent applications offer anti-aging effects and possible deferral of the diseases of aging for both men and women. Learn about the advantages of BHRT and up-to-date research on the topic.

Bioidentical hormones are manufactured in a laboratory and have the same molecular structure as hormones made by your own body. By contrast, synthetic hormones are intentionally different since pharmaceutical companies cannot patent a bioidentical structure, so they invent synthetic hormones that are patentable. At Tikkun, we offer an individualized approach, through our onsite compounding pharmacy, to ensure each patient achieves symptom relief and maximum benefit.

Speakers: Robert Nickell, pharmacist and Dr. Joseph Dubroff, naturopath.

Robert Nickell,
pharmacist

Dr. Joseph Durboff,
naturopath
